

FABRICATION LINE CARD

FABRICATION CAPABILITIES

We have two fabrication shops totaling 133,000 square feet where we are fully equipped to custom fabricate structural steel, platework, chutes, bins, ductwork, piping, conveying equipment, and miscellaneous steel. Recent additions to our shop include a computerized beam line, semi-automatic welding systems, and burn tables. Our shops have a combined fabrication capability of 1,000 tons of steel per month.

All work is visually inspected by a CWI and recorded as per AISC, and AWS codes. Our paint facilities are complete with Wheelabrator and shot blast rooms. Surface preparation of steel and painting are checked by Quality Control and surface profile and paint millage is recorded.
